

FAO Based Responsible Fisheries Management Certification

Notice of 2nd Surveillance Assessment Team Nomination

April 2015

Application submitted by the Alaska Fisheries Development Foundation

On Behalf of

**the U.S. Alaska Pacific cod (federal and state) fisheries in the Bering Sea/Aleutian Islands
and Gulf of Alaska Regions**

Based on the technical expertise required to carry out the above fishery assessment, Global Trust Certification Ltd., is pleased to confirm the 2nd Surveillance assessment team members for the fishery as follows.

Bill Broodie (Assessor)

William (Bill) Brodie graduated from Memorial University of Newfoundland with a BSc. in biology in 1978, and then worked as a fisheries biologist. After a 36-year career with Fisheries and Oceans Canada (DFO), he retired from there in 2014, and has since been doing some fisheries consulting. His main areas of work have included flatfish biology, trawl surveys, and stock assessment, involving various species and several international fisheries in the Newfoundland and Grand Banks regions. Mainly through his extensive involvement with the Scientific Council of the Northwest Atlantic Fisheries Organization (NAFO), Bill participated in and chaired many scientific committees dealing with fishery advice, as well as ecosystem and precautionary approaches for numerous fish and shellfish stocks.

Dr. Ivan Mateo (Assessor)

Dr. Ivan Mateo has over 15 years' experience working with natural resources population dynamic modeling. His specialization is in fish and crustacean population dynamics, stock assessment, evaluation of management strategies for exploited populations, bioenergetics, ecosystem-based assessment, and ecological statistical analysis. Dr. Mateo received a Ph.D. in Environmental Sciences with Fisheries specialization from the University of Rhode Island. He has studied population dynamics of economically important species as well as candidate

species for endangered species listing from many different regions of the world such as the Caribbean, the Northeast US Coast, Gulf of California and Alaska. He has done research with NMFS Northeast Fisheries Science Center Ecosystem Based Fishery Management on bioenergetic modeling for Atlantic cod. He also has been working as environmental consultant in the Caribbean doing field work and looking at the effects of industrialization on essential fish habitats and for the Environmental Defense Fund developing population dynamics models for data poor stocks in the Gulf of California. Recently Dr. Mateo worked as National Research Council postdoc research associate at the NOAA National Marine Fisheries Services Ted Stevens Marine Research Institute on population dynamic modeling of Alaska sablefish.

Dr. Géraldine Criquet (Assessor)

Géraldine holds a PhD in Marine Ecology (École Pratique des Hautes Études, France) which focused on coral reef fisheries management, Marine Protected Areas and fish ecology. She has also been involved during 2 years in stock assessments of pelagic resources in the Biscay Gulf, collaborating with IFREMER. She worked 2 years for the Institut de Recherche pour le Développement (IRD) at Reunion Island for studying fish target species growth and connectivity between fish populations in the Indian Ocean using otolith analysis. She served as Consultant for FAO on a Mediterranean Fisheries Program (COPEMED) and developed and implemented during 2 years a monitoring program of catches and fishing effort in the Marine Natural Reserve of Cerbère-Banyuls (France). Géraldine has joined Global trust Certification in August 2012 as Fisheries Assessment Officer and is involved in FAO-Based RFM and MSC fisheries assessments.

Vito Ciccio Romito (Lead Assessor)

Vito Ciccio Romito is Italian and holds a BSc in Ecology and a MSc in Tropical Coastal Management from Newcastle University in the U.K. After his BSc, he worked in Tanzania as a Marine Research officer at the Mafia Island Marine Park carrying out biodiversity assessments and monitoring studies of coral reef, mangrove and seagrass ecosystems. Subsequently, for his MSc, he worked on fisheries assessment techniques, ecological dynamics of overexploited tropical marine ecosystems, and evaluation of low trophic aquaculture as a support to artisanal reef fisheries. Since 2010 he has been fully involved through Global Trust with the FAO-based RFM Assessment and Certification program covering the Alaska commercial salmon, halibut, sablefish, pollock, crab, Pacific cod and flatfish fisheries as well as the Icelandic cod, saithe, haddock and redfish fisheries. Vito has also participated in IFFO fisheries assessments for anchovy and sardine stocks in both Chile and Peru, and other assessment work in Canada and the Gulf of Mexico. Vito is also lead, third party IRCA approved auditor.
